Bryan Wood

Hometown: Harrisville, NY

Year graduated: 2024

Degree: Associate of Applied Science,
Radiologic Technology

Military Service: U.S. Navy 2011-2015,
Gunner's Mate 2nd Class

How did your time in the military impact your career choice?

Military life could be fast-paced, and daily activities could turn on a dime, for better or for worse. It honors me to have served my country, but I am also glad to have moved onto the next big chapter of life working in a career field with many opportunities and to be able to support myself. Without military service, I don't think school would have been a realistic goal.

Why did you enroll at North Country?

I chose North Country for the opportunity to pursue a career as an X-Ray Technologist through a two-year associate degree program. The college's VA Certifying Official made applying for my Post 9/11 GI Bill absolutely stress-free and seamless from semester to semester.

How did your education at North Country prepare you for what came after, and what you're doing now?

North Country, in addition to my diploma, provided me people skills for a higher education setting, the chance to learn from people of many different backgrounds, and the ability to remain organized with the new online component that is common with most all courses nowadays.

What was your experience like at the college?

The faculty do a fantastic job directing and instructing the Rad Tech program. The program is challenging and demanding but prepares you for working in the field, including all the clinical training hours and preparing you for state licensure as a Radiologic Technologist. I enjoyed my time throughout college in Saranac Lake and, since graduation, have been working full-time for the past year at a hospital in northern New York.

AS: ENVIRONMENTAL SCIENCE | MACOMB, NY

Why did you pick North Country?

I chose North Country Community College because every time that I toured here it just felt like home, and I felt like I was a family member. So many of the staff and students that I met were so kind and welcoming. I just felt comfortable.

What was your experience like in the Environmental Science program?

The best part is you're outdoors and you're able to do so many things you probably wouldn't be able to do if you were in a city. You can connect with nature and learn more about the environment than you would if you were sitting in a classroom.

What was it like living on campus?

I lived on campus (in Saranac Lake) in the dorms, and it's literally like a 5-6 minute walk from campus itself. It's really comfortable and you have your own space so you feel like you're at home.

The most enjoyable part about North Country is just the people. I really love the people and the energy that they bring.

AAS: CRIMINAL JUSTICE | SARANAC LAKE, NY

Why did you go to North Country?

I chose North Country because it is right at home. I'm from Saranac Lake. The opportunity to stay home and go to school in our beautiful mountains was something I could not pass up.

Why did you enroll in the Criminal Justice program?

I have always had a passion for helping other people, and I really feel like getting involved in law enforcement in the community is something that would really suit me very well.

What did you like about the classes and instructors?

Because we don't have incredibly large classes, we are able to have one-on-one opportunities to communicate with our instructors. We can ask questions and there's more personal attention. Since our instructors are former law enforcement officers they're able to provide us with personal experiences they've gone through. You can see behind the scenes of how an investigation works from start to finish.

I think that North Country has done a wonderful job of preparing me with the education that I need to go forward in my career.
